

# Sequence Generator Transformation

# Sequence Generator Transformation

- Generates numeric values
- It can be used to
  - create unique primary key values
  - replace missing primary keys
  - cycle through a sequential range of numbers
- It provides two output ports: NEXTVAL and CURRVAL
- These ports cannot be edited or deleted
- Cannot add ports to the sequence generator transformation

# Sequence Generator (Contd.).

- Nextval port generates the next number
- The CURRVAL port can be used only if the NEXTVAL port is used

Thank You
