

# Worklet

# Worklet

**An object that represents a set of tasks that are created in workflow designer**

**Worklet can be reused in more than one workflow**

**Include worklet in the workflow for execution**

**The workflow that contains the worklet is called the parent workflow**

# Rules of a worklet

**Cannot use variables from the parent workflow in the worklet**

**Cannot use user-defined worklet variables in the parent workflow**

**Can use pre defined worklet variables in the parent workflow**

Thank You
